Dear Mr. Newton,

This is my permission for you to quote from Frame-Up as you state.

I wish you well with your book.

I would caution you against taking the word of the House committee on either assassination. The same goes for those who have recently grabbed that bandwagon and those who have a late interest in the King assassination. You will find that most of the allegations are not factual, out of context or are unjustified embellishments on information that is not first-hand.

The rural routes around here have been renumbered. We are now Rt. 12.

Thank you for ypur comments.

Sincerely,

Harold Weisberg
